Source, Zod.

LANGUAGES

English	Professional Proficiency
Hindi	Native Proficiency
Telugu	Native Proficiency
Arabic	Limited Proficiency

PROFILE

Frontend developer with 2+ years of expertise in developing Angular, React and Next.js applications in an agile environment focusing on all aspects of development, including but not limited to Responsiveness, Internationalization, Web security, etc.

WORK EXPERIENCE

Accenture - Internal Projects | Hybrid | SDE - 1 | 2021 - Present

- ✓ Reduced the bundle size of production build by 21% from 6mb to 4.7mb by implementing lazy loading, compressing assets and updating the build configuration.
- ✓ Migrated 5 Sub Products of client from angular v8 to v15.
- ✓ Migrated Testing framework from Karma to Jest 28 to maintain the logic security using unit tests in a simpler syntax.
- ✓ Increasing and maintaining the code coverage of the product to a benchmark of 90% in every product release.
- ✓ Improved the performance of the app by over 200% after removing legacy code, Refactoring legacy business logic and reducing duplicate scss style imports.
- ✓ Made the product robust by Utilizing Sonar Qube quality gateway configurations to identify and remove security and code vulnerabilities.
- ✓ Rewrote 3 Features from scratch to resolve the vulnerabilities without affecting the legacy flow to avoid major code debt.

Tech Stack : Angular, Angular Material, Spring Boot, Scss, Typescript.

CARHUZ | Remote | Frontend Lead & UI Developer | Freelance | 2023 - 2023

- ✓ Designed and Built an app from scratch, working in a remote team for a US client.
- ✓ Integrated Angular with Java Spring boot microservice REST API's.
- ✓ Improved UI design to match the latest trends and the theme of the product market. Improved the code coverage to 95%, Added Accessibility features, Internationalization, Responsiveness upto 320px and SEO.

Tech Stack: Angular, Angular Material, Spring Boot, Tailwind, Typescript, Swiperjs

PROJECTS

Personal Portfolio

[Live demo](#)

[Github Repo](#)

- ✓ My online portfolio built using Angular , Angular material for most UI components.
- ✓ Added i18n (Internationalization) feature to display my portfolio in more regional languages.

Tech Stack: Angular, Angular Material, Scss, Swiperjs, Vercel.

Tracker.io

[Live demo](#)

[Github Repo](#)

- ✓ Project Ticket managing like SAAS (Software as a service) web-app where user can create and manage their issues.

Tech Stack: Nextjs, Tailwind, Radix UI, NextAuth, Prisma, Postgresql, Vercel.
